

MANAGEMENT
CONSULTED

FAST MATH WORKSHOP

Friday, September 11th: 12 - 3 PM EST

MENTAL MATH

There are no calculators in the case interview, so mental math is a must! We'll cover:

- Tips, tricks, and strategies
- The 6 rules of Mental Math
- Breakouts and exercises

CASE MATH

Once you've got mental math down, it's time to start solving charts, graphs and exhibits. Can you figure out which calculations to run and the associated business insight. An "A" candidate doesn't just solve the math, but ties the answer back to what the numbers mean for the client.

MARKET MATH

Learn and apply key equations, including:

- Profitability
- Breakeven point
- ROI
- Much more!

ABOUT MC

Management Consulted is the world's leading resource on all things consulting, with a focus on case interviews and consulting skill-building. Management Consulted works with 130+ universities every year on consulting prep, including UVA Darden, Columbia Business School, McCombs, and more.

This is an in-person event, and space is limited. Register today!
